

There is no escape, there is only one thing going on here. Please, don't leave. Join us. We may not be perfect, but whatever happens, at least you won't be alone. Join “Team Human.” Find the others. Together, let's make the future that we always wanted. Oh, and those tech billionaires who wanted to know how to maintain control of their security force after the apocalypse, you know what I told them? “Start treating those people with love and respect right now. Maybe you won't have an apocalypse to worry about.”

Thank you.
